DRUG DETECTION & IDENTIFICATION

ARE THERE DRUGS PRESENT? WHEN YOU NEED TO KNOW!
Immediate Results – Accurate – Sensitive – Inexpensive – Safe – Easy to use

Drug detection is as simple as 1, 2, 3...

Field Test-Kits with immediate results
For use indoors or outdoors in any weather condition
Fast and easy to use
No special training required
Wipe the suspected surface, spray with the related Aerosol, or drop from the Pen

Instant color reactions indicates the type of drug
Sensitive, detects as little as 1 nanogram of substance

Our collection of Drug Detection and Identification products provides law enforcement officers and private entities distinct advantages for field use. They are first and foremost non-toxic, non-carcinogenic and will not harm the environment. In addition, they ensure a testing process, which is convenient, fast and efficient. Results appear in seconds. The Identification & Detection process requires no special training and testing can be performed “on the spot”.

**AEROSOLS**

Drug Detection and Identification aerosols are non-invasive, accurate, reliable and easy to use.
Drug aerosols are accepted as presumptive tests by US courts.
Drug aerosols are non-toxic, non-corrosive and safe for individuals and the environment
No ampoules to break. No mixing of test ingredients. No acid neutralizer needed for disposal.
All Drug aerosols perform trace detection as well as identification.

**DRUG DETECTION KITS**

- Multidrug detection kit detects 5 major drug groups.
  D4D Aerosol detects Cannabis, Heroin, Meth and Amphetamine.
  Coca-Test Aerosol detects Cocaine.

The kit is available in test sizes of 100, 50 and 15 tests in each aerosol.
Drug Detection and Identification aerosols are non-invasive, accurate, reliable and easy to use.
Drug aerosols are accepted as presumptive tests by US courts.
Drug aerosols are non-toxic, non-corrosive and safe for individuals and the environment.

- Other kits are available for: Cannabis (requires 2 aerosols),
  Coca, Heroin, Meth and Amphetamine.

No ampoules to break. No mixing of test ingredients.
No acid neutralizer needed for disposal.
All Drug Aerosols perform trace detection as well as identification.
OUR SPRAY COLLECTION DESCRIPTION*

__CANNABISPRAY__ is an aerosol-based field test kit for the detection and identification of marijuana, hashish and related drugs. Cannabispay contents a patented modified Fast Blue BB reagent. Product modifications have been incorporated to reduce the number of false positives, remove suspected carcinogenic elements and stabilize this well known reagent. Using our Collection Paper #0530, simply wipe the suspected surface or touch the substance. Spray first with Cannabispay #1, then with Cannabispay #2. A reddish brown color reaction on the Collection Paper indicates a positive reaction.

__METH-TEST__ is an aerosol-based field test kit for the detection and identification of Methamphetamines (MDMA) and related drugs. Meth Test contains a modified Simon reagent. Product modifications have been incorporated to reduce the false positives, stabilize the traditional Simon reagent and eliminate sensitivity to extreme temperatures. Using our special Test Paper #0630, wipe the suspected surface or touch the substance. Spray first with Meth-Test#1, then with Meth-Test#2. A dark blue color reaction within 30 seconds on the collection paper indicates a positive reaction.

__HEROSOL__ is a unique aerosol-based field test kit for the detection and identification of Heroin, Amphetamines, Methamphetamines, LSD and related drugs. Using our Collection Paper #0530, simply wipe the suspected surface or touch the substance and spray with Herosol. A purple color reaction on the Collection Paper indicates a positive reaction.

__COCOA-TEST__ is an aerosol-based field test kit for the detection of Cocaine, Crack and PCP. Coca-Test contains a patented modified Cobalt Thiocyanate (Scott) reagent. Using our Collection Paper #0530 simply wipe the suspected surface or touch the substance and spray with Coca-Test. A turquoise color reaction on the Test Paper indicates a positive reaction.

__MULTIDRUG DETECTION__ is an aerosol reagent spray that will detect and identify several drugs at once. Wiping any surface once ith the special Test Paper #630 and spraying the paper with the reagent from this can will reveal traces of:

- Hashish and Marijuana, as reddish brown stains
- Heroin and/or LSD, Opium, as purple gray stains
- Amphetamines, as canary-yellow stains
- Methamphetamines, as orange stains

*All tests are also available in drops form*
The Pen Test Series is a set of single and multi-drug ampoule based field test kits for the detection and identification of illicit drugs. Simply swipe, drop and read the immediate results to determine if and what drug residues are present.
